### Dr. Suzanne Cziraki

BSc, Msc, BEd, DDS,  
MSc (ortho), FRDC(C)  
Certified Specialist in Orthodontics

OAKRIDGE CENTRE  
#315-650 W 41st Avenue  
Vancouver

**604.266.8277**

A wise leader once said that sometimes your joy is the source of your smile, but sometimes your smile can be source of your joy.

Unfortunately, too many adults feel self-conscious about the look of their smiles. Dr. Suzanne Cziraki, a Certified Specialist in Orthodontics, emphasizes that although a healthy, beautiful smile is the most obvious result of orthodontic treatment, there is so much more to this specialty than meets the eye.

Orthodontics, the dental specialty of straightening teeth, allows the fit of the upper and lower teeth and jaws to be modified to produce a more esthetically pleasing smile and facial profile. The skin around the mouth and the lips can be dramatically altered by the position of the teeth and the jaws. Dr. Cziraki has had the satisfaction of seeing many of her adult patients develop a renewed zest for life and restoration of confidence brought on by a younger and more attractive looking smile.

The American Association of Orthodontists strongly recommends that all children have an orthodontist examine their teeth before the age of seven. Dr. Cziraki knows how vital it is to identify problems early; however, she reiterates that it is never too late in life to have one's teeth straightened.

For adults it is often the dread of wearing the braces of old—the train tracks we all remember from our high school days—that holds people back from attaining the smile they've always wanted. The good news is that Dr. Cziraki offers many invisible options for creating the perfect smile. With tooth-coloured braces, one doesn't

have to worry about flashing a tin grin. She suggests another alternative called Invisalign™, which instead of brackets and wires straightens teeth with a series of clear, removable appliances called aligners. For those who desire absolutely invisible braces, there are lingual braces, which are placed on the inside of the teeth. Dr. Cziraki encourages those considering orthodontics to take advantage of these new technologies to make a significant and positive change in their lives.

Dr. Cziraki has an impressive academic and educational background and has been acknowledged at home and internationally. She continues to be involved in education as an instructor of dental students at The University of British Columbia.

Dr. Cziraki has a new office location, which she shares with Dr. Ron Markey at the Oakridge Centre. Dr. Markey, the former President of the College of Dental Surgeons of British Columbia,

the Canadian Dental Association and the Canadian Association of Orthodontists, comments, "I feel very fortunate that Dr. Cziraki has decided to establish her orthodontic practice at our Oakridge Centre office. Our combined presence will enable us to provide convenient access to orthodontic care for our patients of all ages".

Call to schedule your complimentary consultation with Dr. Cziraki to find out how your smile might benefit from orthodontic treatment. Ask your dentist for a referral or contact us directly at 604-266-8277 to book your appointment — no referral is necessary.
